(54) PROPYLENE RESIN COMPOSITION, MODIFIED PROPYLENE RESIN COMPOSITION AND PRODUCTION OF THE COMPOSITION

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a polypropylene resin composition improving the transparency and processability of a polypropylene resin or the transparency, processability and impact resistance of the polypropylene resin.

SOLUTION: This polypropylene resin composition comprises 10-99.99wt.% of a branched propylenic resin obtained by the branching and crosslinking reaction of a linear propylenic resin and having a branching parameter of 0.9-0.1, 0.01-90wt.% of a crosslinked propylenic resin, and further a polyolefin rubber having the substantially same refractive index as that of linear polypropylene, when improving impact resistance.

LEGAL STATUS

[Date of request for examination] 26. 02. 2002

[Date of sending the examiner's decision of rejection] 08. 06. 2004

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
